EDUCATION

University of Waterloo • Class of 2025

Bachelor of Computer Science, Business Specialization and Dean's Honours List

EXPERIENCE

Product Engineer • Blue Shell Capital

July 2025 - Present | Toronto, ON

- Drove \$750k in hedge fund client acquisition by leading product, design, and engineering of an onboarding platform that condenses a week-long, 60-page manual enrollment into a DocuSign-integrated survey
- Designed and built an AI workflow that generates actionable market insights and minimizes inbox noise by distilling dense, unformatted research emails into personalized daily summaries for portfolio managers
- Centralized company-wide trade reporting and analytics by engineering an automated pipeline and dashboard that consolidates daily portfolio data from brokers to enhance trading visibility and validation
- Decreased dashboard load times by 80% through implementing local caching and React memoization

Product Manager Intern • Cloudflare

May 2024 - August 2024 | Austin, TX

- Led enterprise access management for Cloudflare Workers by launching new security roles tailored to team structures and workflows from user interviews, enabling large teams to adopt and use Cloudflare safely
- Defined a monetization strategy to boost revenue of a Workers API by 50% via SQL analysis of usage data
- Ran beta testing and triaged 75 bugs for a new metrics dashboard to simplify viewing Worker performance

Product Manager Intern • Ritual.co

January 2023 - April 2023 | Toronto, ON

- Increased active users with notifications enabled by 20% on the Ritual food ordering app by analyzing behaviour data in Amplitude and Looker to identify engagement opportunities that drive order retention
- Designed a co-worker referral system to grow the activation of workplace users – twice as valuable as regular users – and integrate Ritual into their lunchtime routines, supported with user flows and Figma prototypes
- Conducted experimentation and usability testing with 25 customers using Maze to improve beta feature UX

Research Assistant • University of Waterloo

September 2021 - May 2022 | Waterloo, ON

- Performed data scraping, cleansing, and documentation using Python and Pandas for Professor Seda Oz's research on the relationship between terrorism and earnings management ([paper](#))
- Built a web scraper ([Github](#)) to automate the collection and cleaning of court legal data from CourtListener

PROJECTS

Product Manager @ UW Blueprint

December 2021 - September 2022

- Led a team of 12 engineers and designers to build a web app end-to-end that streamlines the coordination of 100+ volunteers at Sistering, a non-profit supporting at-risk women and trans folks in Toronto ([case study](#))
- Halved email volume between volunteers and staff by prioritizing and acting on feedback from biweekly stakeholder interviews, usability testing, and Hotjar heatmaps and analytics
- Produced 13 demo videos and wrote a 50-page user guide, handed off to Sistering for a smooth launch ([link](#))

Ronify ([ronify.me](#))

August 2020 - September 2020

- Co-founded and built a Flask and SQL web app ([Github](#)) for businesses to track customers via QR code forms
- Velocity Incubator semi-finalist and Randy Bauslaugh Entrepreneurship Award winner

SKILLS

Product - Cursor, User Discovery, Product-Led Growth, Go-To-Market, Monetization, Data Analytics, Agile

Design - Figma, Wireframing, Prototyping, User Research, User Flow Mapping, Usability Testing

Engineering - React, Next.js, Node.js, Flask, SQL, NoSQL, Pandas, Git, Postman, Vertex AI, Google Cloud
